Completing TPOPP

- Completing a TPOPP form is always voluntary. TPOPP is a useful tool for the understanding of and implementation of physicians' orders that are reflective of the current medical condition and preferences of a patient. The orders are to be respected by all receiving providers in compliance with institutional policy. On admission to the hospital setting, a physician who will issue appropriate orders for that inpatient setting will assess the patient.
- TPOPP is a physician order set and as such does not replace Advance Directives but should serve to clarify them.
- TPOPP must be completed by a health care provider based on patient preferences and medical indications. Upon completion it must be signed by a physician and patient (*or representative*) to be recognized as valid.
- Use of original form is strongly encouraged. Photocopies and Faxes of signed TPOPP forms are valid. A copy should be retained in patient's medical record.

Using TPOPP

- Any incomplete section of TPOPP implies full treatment for that section.

SECTION A:

– If found pulseless and not breathing, no defibrillator (*including automated external defibrillators*) or chest compressions should be used on a person who has chosen “Do Not Attempt Resuscitation.”

SECTION B:

– When comfort cannot be achieved in the current setting, the person, including someone with “Comfort Measures Only,” should be transferred to a setting able to provide comfort (*e.g., treatment of a hip fracture*).

– Non-invasive positive airway pressure includes continuous positive airway pressure (*CPAP*), bi-level positive airway pressure (*BiPAP*), and bag valve mask (*BVM*) assisted respirations.

– If person desires IV fluids, indicate “Limited Interventions” or “Full Treatment.”

Reviewing TPOPP

TPOPP form should be reviewed when:

- The person is transferred from one care setting or care level to another, or
- There is a substantial change in the person's health status, or
- The person's treatment preferences change.

Modifying and Voiding TPOPP

- A patient with capacity can, at any time, request alternative treatment.
- A patient with capacity can, at any time, revoke a TPOPP by any means that indicates intent to revoke. It is recommended that revocation be documented by drawing a line through Sections A through D, writing “VOID” in large letters, and signing and dating this line.
